2011-2012

SUNS[®] International, LLC

• Innovation • Quality • Service

SUNS International, a leading manufacturer of high quality industrial control products, designs, manufactures and markets complete range of limit switches, safety switches, micro switches, foot switches and proximity switches. Manufactured in ISO9001:2008 certified facilities and certified by UL, CSA, CE and CCC, SUNS products are reliable, competitive and are widely used in:

Material Handling
Stereoscopic Warehouses
Robotics
Printing Machinery
Injection Molding Machinery
Packaging Machinery
Elevators
Safety Doors

SUNS is the right choice for your applications.

Inductive Proximity Sensor

Sensing Distance (Sn)

The sensing distance of the inductive proximity sensor varies with different target materials. The sensing distance of inductive sensor on this catalog use a steel target. The sensing distance for other materials can be calculated by multiply a correction factor shown on the table below:

Material	Attenuation coefficient
Steel	1
Stainless steel	0.85
Aluminum	0.4
Brass	0.4
Copper	0.3

The sensing distance will also vary with different size and shape of the target. Square target block will result in a longer sensing distance than a round one. Bigger target will have a longer sensing distance.

None: Operating frequency of the inductive proximity switch is measured at 1/2 Sn.

- Repeat Accuracy (R) Ratio of the difference value between any of the two measurements and distance of checking (Sn).
- Return Difference (H) Distance between operating point when target metal moves close to proximity switch and reset point when target metal moves away from the proximity.

Wiring Diagram:

	Leadwire N.O.	Leadwire N.C.	Quick Connect N.O.	Quick Connect N.C.
NPN three-wire DC				
PNP three-wire DC				
two-wire AC				

None: Load with two-wire AC can be connected to either of the brown or blue leadwire.

Series and Parallel

Note :

- For series connection, if sensors do not operate stably, provide each with a 500 k to 10 M resistor in parallel. This will stabilize the voltage and allow the sensors to operate stably.
- Use parallel connect only when 2 or more sensors are not activated simultaneously. The leakage current, however, will be n times the value for each Sensor and reset failures will frequently occur.

Mounting Requirements

Inductive Proximity Switches

Ordering Codes

SLS-40 Series (Square Type) Inductive Proximity Switches

Housing Type: Plastic
 Operating Temperature: -25°C~70°C
 Protectio: Reverse Polarity Protection +
 Short circuit and overload protection
 LED indicator: Red output energized, 360° visibility
 Degree of Protection: IP67 (EN 60529)
 Applicable Standard: GB/T14048.10 EN 60947-5-2
 Certification: UL Certification: E310408
 CCC Certification: 20080103050268320

M12 Connector Cable

M12 Connector Cable Specification:

Specifications	
Connector Locking system	Screw M12 x1
Connection section mm ²	Max. 0.25(24AWG) / Max. 0.34(22AWG)
Degree of protection	IP67 / IP68
Mechanical operation	>500 mating cycles
Operating Temperature:	-25°C to 85°C (PVC), -40°C to 85°C (PUR)

■ Selection Guide

QC	-	4	-	12	-		-	2	-	PVC	
		3	3 Core			S	Straight	2	2meter cable	PVC	PVC Jacket
		4	4 Core			A	Angle(90degree)	5	5meter cable	PUR	PUR Jacket

M12 Straight Connector cable
QC-4-12-S-2-PVC

M12 Angled Connector cable (90 degree)
QC-4-12-A-2-PVC

M12 connector pin connection diagram

- 1 Brown
- 2 White
- 3 Blue
- 4 Black

Proximity Tester (Model ST-800)

SUNS ST-800 proximity switch tester is designed to test most 3 wire DC proximity switches: inductives [metal sensing], capacitives, photoelectrics or ultrasonics. The unit is fitted with 2x 9V batteries ready for use.

Standard color coding for 3 wire proximity switches is Brown = Positive Black = Load, Blue = Negative (-) [Note: some universal DC switches can vary, try to follow makers wiring instructions]

TESTING INSTRUCTIONS

Connect the switch to the ST-800, place a suitable target in front of the switch. If the switch is functioning correctly, the unit will give audio and visual indication showing the switch operates and indicating the functionality of the switch according to the chart below :

Switch type	Buzzer & LED on when	LED
PNP normally	open target in range	PNP
PNP normally	closed target not in range	PNP
NPN normally	open target in range	NPN
NPN normally	closed target not in range	NPN

If the proximity switch does not give such feedback when correctly connected to the tester, it has probably failed. [Note: The ST-800 will not test 2 wire AC or DC switches]

LED Functions

Green I/O LED	switch connected & unit on
Red (Batt) LED	battery low indicator
PNP or NPN LED	indicated switch type
